The SmartFloor Stain Remediation Inserts are used in the SmartFloor progressive polishing programs to improve appearance and remove etches and stains on polished concrete and stone floors.

Features
- Revolutionary diamond technology maintains and restores the clarity of concrete and stone floors
- Removes stains and etches
- Made with recycled material

Benefits
- Different levels of Inserts allow remediation and installation on all levels of concrete and stone from severe to moderate
- Utilizes existing equipment
- Easy to use; eliminates the need for a special project team
- Lowest cost method to remediate stains and etches

Applications
- Use as progressive polishing steps within the SmartFloor and Stone Guard programs
- Perform standard polishing, acid etch and stain remediation with auto scrubbers and single disc machines (100rpm to 750rpm)
SmartFloor
Stain Remediation Inserts

Use Directions
While using the SmartFloor Stain Remediation Inserts, note the following:

- All progressive polishing and stain remediation steps, while using Inserts, must be performed wet.
- Do not remain stationary when using Inserts; a “donut” ring can form in the floor.
- Recommend using at a slow pace when performing progressive polishing.
- Use the appropriate size SmartFloor Driver Pad for your machine. [Example: if the machine requires a 17-inch (43 cm) pad, use the SmartFloor Driver Pad – 17-inch (43 cm).]
- Place Inserts into the Driver Pad openings, firmly attaching the Velcro of the Inserts to the pad. Depending on the size, Driver Pads require 3 or 4 Inserts. *Fill all holes of the Driver Pad with Inserts. Do NOT leave an empty space.

- Place combined pad and Inserts under the machine, writing side up, on the pad driver.
- All SmartFloor Stain Remediation Inserts must be changed simultaneously. Do NOT change one Insert and leave worn Inserts on the same SmartFloor Driver Pad. All Inserts must be changed at the same time.
- After EVERY use, rinse the Inserts under tap water and leave to dry.

For proper procedures on Stain Remediation, Daily Maintenance and Installation/Renewal of the SmartFloor or Guard Program, refer to the proper procedural guides.

Safety Reminder
Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use, and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. SDSs are available on-line at www.sealedair.com or by calling 888-352-2249. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate. Please refer to the Diversey HazMat Library, only available through Internet Explorer, http://naextranet.diversey.com/dot/, for up to date shipping information.
